

TECHNICAL COLLABORATION

Elecster Oyj Finland & Kompass Pakistan Enter into a Technical Collaboration Agreement

Kompass Pakistan has gone into technical collaboration with Elecster Oyj Finland to operate as primary packaging film supplier of aseptic milk & juice pouch for Pakistan market as well as globally.

Elecster is the leading company in the world as a system supplier for UHT lines, Aseptic Pouch Filling Machines, and ecological Pouch Packaging Materials. Compared to other packages, Elecster Milk pouch is light, which means less weight and less waste, and therefore savings. Another major advantage of Elecster's pouch pack is that it is 100% Recyclable.

With this technical collaboration, Kompass has developed high barrier aseptic pouch packaging in Pakistan which has reduced the lead time & landed cost for Elecster's customers in Pakistan as compared to the imported material. This high barrier aseptic pouch has all the properties to keep UHT milk & juice products fresh for up to six months.

Kompass has the full technical support from Elecster to maintain the same quality of packaging material being produced in Pakistan.

Kompass has been successfully providing Elecster packaging material to FrieslandCampina Engro Pakistan for their Olpers pouch packs for more than a year now.
